dev-stack:

astro / react / next / angular / stencil / drupal / wordpress / firebase / css / tailwind / sass / svg / sketch / webstorm

Personal Profile

I'm a web developer with close to 30 years of experience. I specialise in architecture, programming and design of web applications. I'm a curious and analytical person, with a creative touch, combining technical expertise with a strong sense of design and usability. I strive to create user-friendly, informative, and easily maintainable web applications. Over the years I learned to quickly adapt to the ever changing technical landscape of frontend development. Therefore I am usually able to onboard quickly in a complex development environments. I am a serious worker, but also a pleasant and supportive colleague.
